environment

How We Do It

Produced within an organic system where every chestnut is benefited, as nothing is loses, everything changes. In this way, we have partnerships with responsible nurseries in the region by collecting and reusing the shells for fertilization purposes for example.

Our nuts are free of organisms
modified genetics and synthetic chemicals.

Mission

"Our commitment is to provide high quality products, contributing to health and well-being of our customers, while promoting practices sustainable production and processing of chestnuts."

Vision

"To be recognized as a leader in processing industry chestnuts, boosting the innovation, quality and care with the environment."

Values

1. Offer high quality products, following the highest standards of food security.
2. Value sustainable practices throughout our production chain.
3. Act with honesty, transparency and ethics in all our operations.
4. Constantly seek improvements and innovations.
5. Contribute to the development of local communities where we operate.
